

### Netflix/Amazon Prime

Subscription services often have a fantastic selection of foreign language series and films. You can usually add English subtitles to these too. Even better, you can add French or German subtitles to most things that you watch in English. By doing this, you will become exposed to a wider range of vocabulary.

### Video Games

Most video games will give you the option to change the main language in their settings. For example, you could increase your knowledge of countries in French or German by changing the language on FIFA!

### **Free language learning apps**

#### Duolingo

Duolingo is a fantastic resource for the early days of language learning. It gradually builds up exposure to new language, so is a great tool for those in KS3.

#### Linguistica 360

This app is suitable for KS4 students who are more advanced in their language learning. The main focus here is listening and your exposure to the target language is increased through podcasts of current news stories. Understanding current affairs in the country of the language you are learning is a fantastic way to improve your conversational skills.

#### Beelinguapp

This app focuses on the key skill of reading in the target language. It has a wide range of material and offers both news stories and short novels. There are also some comprehension questions at the end of each text to help deepen your understanding. This is great practice for your GCSE exam.
